PROFILE

Final-year B.Tech Information Technology student with hands-on experience in full stack web development using **Java, Spring Boot, MySQL, HTML, CSS, JavaScript, and React**. Built responsive web applications and REST API-driven systems with clean UI integration and scalable backend architecture. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, and modern software development practices. Actively seeking a **Full Stack Developer Intern** opportunity where I can contribute to frontend and backend development while learning from real-world engineering teams.

KEY STRENGTHS

- Good understanding of databases, APIs, and problem-solving concepts.
- Strong programming skills with knowledge of front-end and back-end technologies.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6), React.js, Responsive Web Design

Backend: Java, Spring Boot, REST APIs, Hibernate/JPA, JDBC, Maven

Database: MySQL, Relational Database Design

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, Postman, VS Code, MySQL Workbench

PROJECTS

Inventory Management System (Full Stack)

Nov 2025 – Jan 2026

Technologies: Java, Spring Boot, Hibernate/JPA, MySQL, HTML, CSS, JavaScript

- Developed a full stack inventory management application with a responsive frontend and REST API-based backend.
- Implemented product management, stock tracking, and inventory transaction workflows with real-time API integration.
- Built CRUD operations, server-side validation, and stock in/out logic while maintaining transaction history for audit tracking.
- Designed a normalized MySQL database schema and integrated frontend forms with backend endpoints.
- Filed a patent application for the project under the Government of India (Application No. 202541114079).

Event Reservation Management System

Jan 2026 – Feb 2026

Technologies: Java, MySQL, HTML, CSS, JavaScript

- Built a reservation management application with user registration, authentication, and event booking functionality.
- Designed relational database structures including a many-to-many junction table for users and events.
- Implemented booking validation and dynamic total price calculation based on event data.

Central Authentication System

Mar 2025 – Jun 2025

Technologies: Java, REST APIs, MySQL

- Developed a token-based authentication system using SHA-256 password hashing and HMAC-signed session tokens.
- Implemented token expiration, session validation, and secure authentication workflows for backend services.
- Integrated authentication with external API requests to ensure secure access control across modules.

EDUCATION

B.Tech, Information Technology

Expected Jun 2027

Sri Shakthi Institute of Engineering and Technology, Coimbatore

CGPA: 7.44

CERTIFICATIONS

- Infosys Wingspan – Java Spring Boot
- Udemy – The Complete Java Programmer
- Udemy – MySQL Database Basics

ACHIEVEMENTS

- Solved 230+ problems on LeetCode, strengthening problem-solving and DSA skills.
- Filed a Government of India patent application for an Inventory Management System concept.
